The complete record

Every carousel. Every citation. Filed by pillar.

This is the evidence ledger — a running index of everything Span Protocol has published, organised the way a research archive should be, not a social feed.

All entries

Research Digest

Protocol Stack

Data & Biomarkers

Myth vs Mechanism

WEEK 1

[The biomarker your doctor never orders VO₂ max and the 122,007-person study behind it](#)

[RESEARCH DIGEST](#)

[The minimum effective zone 2 protocol 150 minutes a week, the modality breakdown, and the data](#)

[PROTOCOL STACK](#)

[Inside the study that changed cardiology The full Cooper Clinic methodology, dose-response curve, and limitations](#)

[RESEARCH DIGEST](#)

[HRV baselines: what the numbers actually mean Reading your wearable data without chasing nightly noise](#)

[DATA & BIOMARKERS](#)

[DATA & BIOMARKERS](#)

[Fasting longer is not better What 36+ hour fasts actually cost you, and the 14–16 hour alternative](#)

[MYTH VS MECHANISM](#)

WEEK 2

[Your sleep score is lying to you What validation studies reveal about wearable sleep staging](#)

[RESEARCH DIGEST](#)

[The 30-day HRV baseline protocol The one metric that changes how you read everything else](#)

[PROTOCOL STACK](#)

[What validation studies reveal about your wearable The 2023 meta-analysis of 14 studies, metric by metric](#)

[RESEARCH DIGEST](#)

[Six wearable metrics that are actually reliable A trust-rating for every number your device shows you](#)

[DATA & BIOMARKERS](#)

[Zone 2 vs HIIT: what the longevity research shows Why the two aren't interchangeable, despite what your feed suggests](#)

[MYTH VS MECHANISM](#)

WEEK 3

[The 60-year-old with the biology of a 45-year-old: how to know when you're](#)

[The 80-year-old with the biology of a 45-year-old Inside the HUNT4 outlier cohort and what they have in common](#)

[RESEARCH DIGEST](#)

[The six variables separating outlier agers from everyone else No supplements required — the data says so directly](#)

[PROTOCOL STACK](#)

[What 1,567 older Norwegians taught us about mortality The full HUNT4 methodology and what "preserved function" really meant](#)

[RESEARCH DIGEST](#)

[Biological age vs chronological age — how to measure the gap DunedinPACE and the clocks that actually correlate with outcomes](#)

[DATA & BIOMARKERS](#)

[What genetics actually determines about your lifespan Less than you think — and the twin studies that prove it](#)

[MYTH VS MECHANISM](#)

WEEK 4

[NMN vs NR: the 2024 human trials The debate is settled. Here's what the data actually shows](#)

[RESEARCH DIGEST](#)

[The NAD+ protocol: what works, what's overhyped Three free interventions that outperform any supplement](#)

[PROTOCOL STACK](#)

[Zinc deficiency in men over 35 The four absorption saboteurs blocking an adequate](#)

[diet](#)

[RESEARCH DIGEST](#)

[Optimal vs normal: 8 biomarker ranges your doctor won't show you](#) [The reference ranges built for absence of disease, not optimal health](#)

[DATA & BIOMARKERS](#)

[Sunscreen and longevity — the actual calculus](#) [Vitamin D, skin cancer risk, and what the evidence actually weighs](#)

[MYTH VS MECHANISM](#)

Archive continues weekly. 65-post catalogue across the first 90 days.

Span Protocol

Research-backed protocols for living longer, sharper, and stronger. Published five times a week.
